

PSMenu

Mechanism of order menu that you can make yourself

- The difference between the product version (PSMenu) and the FreeVersion of the android app is whether or not you can confirm the order.
- Two types of resolutions are created as samples, but if they are different, please create them with the setting function (psMxml.exe)
- It is possible to operate the android terminal in Japanese and the windows terminal (psOrder.exe) in English.
- Please obtain PSMServer from "<http://psmenu.starfree.jp/>" and PSMenu from "Google Play"
